Submit Sample

If you already have an account, please use a QR Coded reader app to scan a bottle barcode. Please note the only method of submitting a sample with this application is by using a QR reader, entering samples manually is not allowed for quality purposes.

If you do not have a QR Code reader installed you can visit the app store for your device, there are many free options available for both IOS and Andriod. Please note that some devices\operating systems may include a QR Coder reader and do not require a 3rd party application.

If you can not find an QR Code reader you can try:

<https://www.scan.me/download/>

Please note 3rd party QR Code applications are not maintained nor endorsed by ADH. Any reference to a QC Code reader is provided only for your convenience.
